

Henna Therapy™

Reconstructive Treatment

Henna Therapy™

Three jewels, one unique essence

Henna Therapy™ is a hair restructuring line, that uses the regenerating and nourishing properties of the Lawsonia Inermis Extract, better known as Henna. Three sophisticated products that work together to rebuild damaged hair and maintain the stalk healthy and protected.

Middle-Eastern Secrets

In Middle-Eastern culture, **Henna** plays a key role in religious ceremonies and is also used to mark life's phases. In hair care, **Henna** is the symbol of beauty, it protects the hair making it more voluminous and shiny. It is also ideal to protect from the external agents and facilitates the link between hair and dye, for deeper and more long-lasting coloration.

The sweetness of the **date**, a highly-valued fruit in the Middle East because of its remarkable nourishing properties, is not limited to its use in the kitchen. Rich in Vitamin B and folic acid, it strengthens the hair, giving it volume, shine and helping it grow.

The exotic **Muru Muru butter** is the fruit of a palm tree that grows mainly in the north of Brazil. It not only has lenitive and regenerating properties, but it is also rich in fatty acids which create a natural barrier on the hair, nourishing, softening and hydrating it deeply.

Hair Rebuilder Shampoo

Thanks to the **nourishing power of Henna** and of the **Date**, the Hair Rebuilder Shampoo guarantees voluminous, brilliant and vital hair, even after a few applications. To be used together with the Henna Therapy™ Hair Rebuilder Cream, to obtain optimal results.

Hair Rebuilder Cream

The Hair Rebuilder Cream rich in **Henna Extract, Date and Muru Muru Butter** enhances the vitality, shine and color of the hair. It interacts with the hair keratin, coating and smoothing the stalk thus preventing the formation of split ends and boosting the intensity of the color.

Hair Rebuilder Lotion

Studied to reinforce instantly stressed and damaged hair, the Hair Rebuilder Lotion with **Lawsonia Extract** makes maximum use of the regenerating properties of Henna. These restructuring phials give the hair the necessary nourishment, combining the hydrating power of the Lawsonia extract with a rich multi-protein complex, in order to obtain an effective anti-age and anti-breakage action.
